

CSEN403: Concepts of Programming Languages

Logic Programming VI

Nada Sharaf

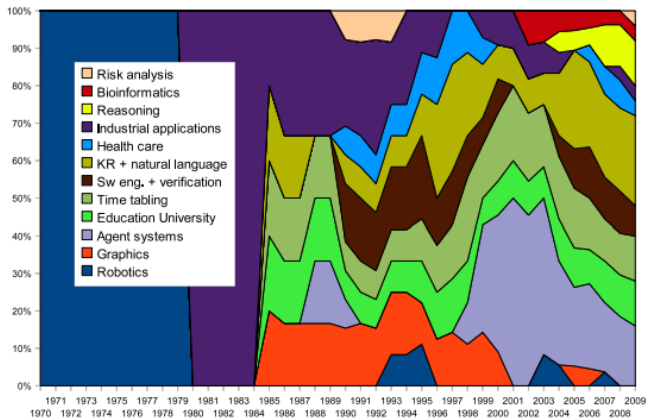

Spring Semester 2021

- OMAR: an interactive scheduler for predictive and reactive routing of the Alitalia fleet(s)
- IDEA: an intelligent data retrieval system
- SECRets expert system: used by banks for the analysis of client-specific data

Logic Programming to Solve Famous Real-Life Problems

- Optimizing space for shoe industry
- Nurse Scheduling

Evolution of Applications

- Amazon AWS

Constraint Programming

Thank you
